Dan, I believe you were going to rewrite the VI assessment so that I could attach it to the Five-Year Review addendum. This is the last thing that I'm waiting on to complete this. Do you have an idea of where it is on your list? I can't remember the date when I gave it to you. Thanks!

Erin, after a very brief look at the 2015 data there was only one well with a hit of cis at 9 ug/L. No human health risk in overlying structures from VI based on that hit.

Dan, here is the most recent data for DICO. Can you update the VI evaluation based on this? If so, can you give me an ETA? I'm waiting on other stuff for this site, so I'm NOT in a hurry, but I don't want it to slip through the crack either. Thanks!

Subject: RE: DICO OU-3 (Des Moines North Plume)

Erin,

I have attached the 2012 sample report (see attached DSM-North Plume OU-3 2012.pdf) from Bob Drustrup for DICO OU-3 (what we refer to as the Des Moines North Plume). I will revise the report and add the data from the seven well samples I collected on 11/3/2015 and 11/4/2015 (see attached DSM-N Plume 2015.pdf). I had our lab run an 8260 on the samples and should have selected 524.2 – lower detection limit at SHL. I got a hit of cis-DCE in NW-36 at 9 ug/L in 2015.

Subject: Dico Ecological Risk Assessment

Hylton, here is a copy of the final Dico Ecological Risk Assessment for your initial review. As I discussed with you on the phone, due to the significant risk, I am having EPA's human risk assessors look at the numbers to make sure there is not a potential risk to the homeless population on site.

I am going to send this to Dico once I confirm what this will do to the protectiveness statement and will include you on that correspondence. Please let me know if you have any questions.
Thanks!
